

## **Sanoderm**

### **Composition:**

Each gram perfumed emulsion contains: 12.5 mg neomycin sulphate, 0.2 mg dexamethason, 1.7 mg cystein hydrochloride, 2.5 mg d-panthenol

### **Action:**

Neomycin has a bactericidal action against Gram-positive and Gram-negative bacteria, as well as penicillin resistant Staphylococcus, and as such is well suited for surface treatments, without toxic or irritating side effects. Dexamethasone, a synthetic corticosteroid, has a fast and long pertaining anti-allergic and antiphlogistic action. Cystein and panthenol have both a role in the metabolism of skin cells. Sanoderm is non-irritating, smells well and is easy to use, also in hairy parts.

### **Indication:**

Local skin problems, caused by infections, pruritus, eczema, alopecia, psoriasis, herpes, allergies, and as supporting therapy with parasitic dermatitis.

### **Administration/Dosage:**

Rub into affected areas 2 to 3 times per day, until improvement occurs. Afterwards repeat treatment every 3rd day, until complete healing.

### **Package:**

Bottles of 60 and 100 g bottles

### **Storage:**

Cool (8 - 15°C), protected from light.

### **For animal treatment only**
